Camera Settings – Field Checklist

Assess the scene ... decide what you want to shoot.

1. Set Zoom
2. Set Aperture - F8 is great, adjust as needed
3. Check Shutter Speed - faster is better
4. Check ISO - lower is better
5. Set Auto-Focus to All Points, Zone Mode or Single Point
6. Set Meter Mode to Evaluative for balanced scene
 - Spot or Partial Metering if a small area is important

Checks All Settings Frequently!

- 1) Print out this document and cut out on the solid lines.
- 2) Fold it on the dotted line.
- 3) Stuff it in your camera case for quick reference.
